HA, not all are equal...

The benefits of Hyaluronic Acid have been touted in many articles over the last year. The popularity of HA increases everyday, but are you aware all Hyaluronic Acid products are not equal? Oral supplementation of HA relies completely on absorption into the body. Biocell Technologies has a patented hydrolyzation process that dramatically reduces the HA molecule for maximum absorption while maintaining the integrity of the HA molecule. In addition to the HA, Biocell Collagen II™ provides very low molecular weight chondroitin, type II collagen and glucosamine. This allows for maximum joint relief, a benefit pure HA products cannot provide. Of course the benefits for the skin, eyes and cardio-vascular system are still evident and on par with brands featuring pure HA only. California Natural Special HA Formula features Biocell Collagen II™ and delivers a full 50mg of HA per capsule. With an effective daily HA dose of 150 mg, California Natural HA accomplishes this with only three capsules as opposed to up to eight capsules by other leading brands.
