## Grapefruit Seed Extract

From the seed of the grapefruit comes an effective and potent natural antibiotic. Grapefruit seed extract has been used by naturopathic physicians for over twenty years for internal and external treatment of infections caused by parasites, viruses, bacteria, fungus and more. Grapefruit seed extract has been tested and found to be as effective as antibiotics in treating certain bacteria and fungus with no side effects.

Grapefruit seed extract contains strong polyphenols known as quaternary ammonium compounds.

This compound has an antimicrobial effect and attacks the cytoplasmic membrane of a microorganism thereby making it unable to function properly. Grapefruit seed extract is effective and safe with no known toxicity and no impact to human intestinal bacteria.

## CALIFORNIA/NATURAL special formula **Immunity Shots™ Spray**

### \* Wellness In A Bottle

- **Organic Ginger**
- **Oregano Oil (70% carvacrol)**
- **Colloidal Silver**
- **Opti Zinc**

Immunity Shots Spray synergetic blend of ingredients provides immediate relief to cold, flue and allergy type symptoms.

Immunity Shots Spray special formula is perfect for individuals seeking to improve overall health and wellness.

Workers in germ filled environments, and persons who have to travel in public places (subways, trains and air plans) can all benefit from this great synergistic blend of nutrients.

Manufactured for distribution by

## Ginger

Almost everybody knows of how great ginger is for motion sickness and nausea. What is not well known is that ginger works great in alleviating many of the symptoms associated with colds and flues. In recent published research in the Lancet Review and other prestigious medical journals, gingers traditional uses have been confirmed. Ginger was found more effective than pharmaceutical drugs at treating motion sickness and nausea.

The pungent compound in ginger has been found to have a similar structure as aspirin. This gives ginger an anti-inflammatory affect that can reduce some of the symptoms associated with illness.

Ginger is also known for its warming expectorant action on the upper respiratory tract. It suppress coughs and encourages the release of mucus and phlegm. In Asia, ginger has long been used as a remedy for sore throats. Ginger creates a strong diaphoretic action promoting sweating and improving over all circulation this can give relief to low grade fevers. Not only does ginger give relief to cold, flu, and allergy symptoms, but it can help ward off illness due to it's effectiveness as a natural antibacterial agent.

Ginger is found in many places around the world but only certain types provide the rich aromatic oils and resin known as phenylalkylketones called ginerols, shogaols and zingerone in high enough potency to allow this root to do its miraculous work. California Natural fly's its ginger in fresh from organic ginger farms from Hawaii. The ginger is only harvest in winter months when the root is at its ripest. It is then packed in ice to preserve its freshness. This ginger is thin

skinned with a bright yellow color providing a root very high in ginerols. It is then fresh pressed to ensure the highest quality ginger extract available. It is this ginger that is used to insure the effectiveness of Immunity Shots.

## Historical Use Of Colloidal Silver

From the times of Hippocrates "The Father of Medicine", ancient Greece, Rome and Macedonia, to present day, colloidal silver has been widely recognized for its antibacterial and antiviral properties. The use for silver has been documented for hundreds of years not only to reduce food spoilage, but also as a natural antibiotic.

Before the discovery of antibiotics, silver was the most frequently used remedy in the world. Before the year 1939, silver was approved and used intravenously by The Council on Pharmacy and Chemistry and the American Medical Association. With it's highly antiviral and antibacterial properties it's no wonder that it is used for the treatment of many diseases such as cholera, syphilis, epilepsy and currently the HIV and AIDS patients.

### How Silver Works:

Colloidal Silver attacks the oxygen metabolism enzyme (the chemical lung) of virus, fungus, bacterium or any other single celled pathogen in its presence. Within a few minutes the pathogen suffocates and dies. The dead pathogen is then removed from the body by the immune, lymphatic and elimination system. Colloidal Silver does not damage or destroy beneficial enzymes and it only attacks the primitive single celled life that infects the host body. This ability makes Colloidal Silver an extremely safe and effective antibacterial agent.

## Oregano Oil

Studies conducted by George Town University in Washington D.C. showed Oregano Oil works as an effective anti-fungal agent. It has proven to completely kill the fungus known as Candida Albicans. The results of the tests were positive with concentrations as minimal as 0.25mg/ml. Not only has it proven to be very effective, but it is also a lot safer to use than popular anti-fungal medications. In other studies, oregano oil has shown to effectively kill the nasty bacteria staphylococcus, which is responsible for a variety of infections.

Not all oregano oil is the same. California Natural uses only the choices wild Mediterranean oregano plants harvested in mountain regions. Wild Mediterranean oregano plants from this source provide the richest source of the active constituent found in the oil known as carvacrol. It is the carvacrol oil that is responsible for oregano strong anti-fungal and antibacterial effect. California Naturals wild Mediterranean oregano oil is guaranteed to provide a minimum 70% carvacrol content to insure the effectiveness of Immunity Shots.
